NEW ADVERTISEMENTS.

WHY DOES THE APPETITE FAIL?—Because the organs of which the appetite is the purveyor do not duly perform their functions. When the food, instead of nourishing the body, becomes a source of pain and discomfort, the desire for it diminishes. A "cathartic invigorant," in other words, a medicine that will remove the crude results of indigestion from the bowels, and at the same time tone and regulate the liver, and truly prevent future obstructions of a like nature, is the only appetiser required. Now, this is exactly the operation of Bristol's Vegetable Sugar-coated Pills. They will put the digestive organs in a condition to consume the quantity of food necessary to promote health and vigor. cj—je20

The Sorata Mails

LATEST FROM EUROPE.

Lisbon, 27th May.

The change of affairs in France is the great news of the day. In the sessions of the Assembly at Versailles on the 24th Thiers, in reply to the interpellation of the Right upon his policy in forming the new Cabinet, alluded to the conflict of parties and said that as it was impossible to found a Monarchy the legal form of the Republic should be determined on. A vote of want of confidence in Thiers was brought up the same evening and carried by 360 to 344 votes, whereupon the President sent his resignation, and the debate lasted till midnight. The vote resulted for accepting Thiers' resignation 368, against 339. The next step was to elect a successor, and Marshal McMahon was chosen by 390 votes, the other 317 deputies refusing to vote. The Commander-in-chief at once accepted, and was saluted President of the Republic. French rentes fell to 87.35. The news created much anxiety all over Europe, and excitement ran high in Paris, but no disorder occurred, the garrisons of Paris and Versailles being kept under arms. McMahon at once formed his Cabinet and declared he would maintain the existing order of things. Rentes rose to 89.05.

Several Republican officers resigned their grades in the army. MacMahon sent a Message to the Assembly in these words—

"The wishes of the Assembly shall be scrupulously carried out.

"M. Thiers acted with consummate ability to obtain the evacuation of French territory.

"The conclusion of this task now depends on the Assembly.

"Relations with Foreign powers to remain unchanged.

"Home policy to be highly Conservative.

"The Executive will defend society against the factions.

"The integrity of the Assembly will be guaranteed by the President."

Most of the crowned heads in Europe sent telegrams to MacMahon congratulating him on his taking the reins of power. Thiers took his seat in the Assembly as leader of the Left Centre. The excitment abated in the Provinces. MacMahon appointed Conservative prefects everywhere. The Bonapartists support the Government. Tranquillity prevails in all the Departments.

Advices from London by telegraph state that the House of Commons rejected Miall's motion for disestablishing the Church of England, by 356 votes against 61. All arrangements are concluded for the coming marriage of Prince Alfred, Duke of Edinburg, with the Grand Duchess Maria Alexandrowna, 4th daughter of the Russian Czar. General elections are to take place all over the U. Kingdom in Spring. After voting supplies in Feb. 1874 the Parliament will be dissolved. The feeling in England respecting Thiers is of the most flattering kind; he is regarded as the man who saved society from Communism and held France together at the most critical period ever known in her history.

The financial crisis in Austria is at an end, thanks to the energetic measures taken by the Government. All the newspapers agree in saying that but for the steps so promptly taken the consequences would have been dreadful. As it is, the commercial public has suffered little or nothing: the losses were on the Bourse of Vienna, among speculators. The Finance Minister at once summoned all the joint-stock companies to present their books, so as to determine which of them should be ordered for liquidation or declared bankrupt. The Emperor has named Hulesch Burgo-meister of Prague, as a concession to the Bohemian national party. A new Ambassador is named to the Vatican, in place of Baron Kubeck. The Austrian estimates for 1874 shew a deficit of 3 millions sterling, which the Minister proposes to meet without increasing the national debt.

Riots occurred at Pisa and Florence, which seem part of a revolutionary movement all over Italy, obliging the Government to double the garrisons in all the large cities. It is thought the Government will declare Rome, Naples, Florence, Pisa and Milan in a state of siege.

Prussia is making great military preparations. Krupp's and the other arsenals are working day and night, turning out artillery and the newly improved needle-guns. It is believed the recent movements in France have much to do with this. Mr. Forkenbeck announced in the House of Deputies that Minister Itzemplitz had resigned the portfolio of Commerce, and his resignation was accepted, on account of the Wagener question; his successor is Mr. Achewbach, sub-secretary of State. The annual report on Alsace and Lorraine occupied the Chambers; Bismarck said "the dictatorial rule will terminate on New "Year's day of 1874 unless the Chambers determine otherwise. Several "projects will be presented touching "the future of these Provinces, and "the task will be easy if the good-"sense of Alsatians and Lorrainers "prevail over mistaken sympathies or "passions. We have to repress all "French tendencies in the provinces "which we have annexed to secure our "frontier on a side where it has been "menaced for 200 years. We Germans of the North, have little tact "in gaining sympathies, but we wish "to give the inhabitants of Alsace and "Lorraine as little trouble as possible. They may question our ability, "but not our perseverance or valor, "and whenever assailed we are always ready to repel attacks (applause). At the same time we will "bring in a bill to abolish the present "system of martial law in Alsace and "Lorraine."

The Russian papers contradict a telegram in the *Times* that Khiva had been taken, the Khan having submitted. On the contrary the Khan called out all his people to fight to the death. A fight with the Russian vanguard resulted in several Cossacks killed and others taken prisoners. The Russian papers say that Turkey is now on its last legs, and great events are impending.

Spain is still going on very badly. Madrid telegrams of yesterday (26th) deny the rumor of a battle with the Carlists. Gen. Nouvilas returns to Madrid, where things are at sixes and sevens. The Marquis Albaydia is likely to be elected President of Congress, which, the papers say, will then be a Bull-ring, with an old fool for manager. The Carlists are reported as gaining ground, but the southern provinces are decidedly opposed to Don Carlos. Meantime the Carlists have recently equipped some smart, battalions of volunteers armed with rifles, and nothing is wanting but a base of operations, for which end they must capture some large city or fortified place. The attacks on the Badajoz and Ciudad Real lines of railway have been repeated.

Some of the Lisbon papers throw doubt on the telegram from Madrid that the Finance Minister declared the Government Bonds of 3 per cent. would henceforth receive only 1½ per cent interest, adding that the coupons would be from henceforward punctually paid. An official contradiction has been published of the rumored loan raised in London by the Carlists. The *Gazette* of the 23rd published a decree whereby men in the army may marry in future without special permission from the War-Office. It is supposed that as soon as the Federal Republic of Spain is proclaimed they will elect Pi Margal President, in which case he would choose a Cabinet of young men, such as Maisonneuve, Calzada, Moreno, Rodriguez, Aberzuza &c. The republicans Roque, Barcia and Salnochea, dictator of Cadiz, have made a league against the Government. Felix Pyat, the Communist has arrived at Cadiz, to attend the International Congress of Red Republicans from Spain, France, Germany, Switzerland, and Belgium. The Government troops have been expelled from Cadiz, and the sacred ornaments removed from the churches.

It is understood that Gen. Nouvilas, commanding against the Carlists, is a traitor to the Republic, having arranged with Ollo, Elio, Dorregaray and other Carlist leaders to overturn the Republic and proclaim Alfonso de Bourbon as King of Spain. The republican general Maldonado is in a critical state, surrounded by 5,000 Carlists at Estella, Nouvilas had 5,000 men when he left Victoria on the 24th, and on the march 30 officers with some squadrons of cavalry deserted, passing over to the Carlists. Many respectable people have lost all hope of a Republic restoring order, and are joining the Carlist party. Dorregaray has a body of 8,000 Carlists, and is in quest of the Republican army.

Telegrams from Japan, May 24th, say that the palace of the Mikado at Jedo was burnt down on the 5th.

A battle in Cuba resulted in 80 killed between the contending forces.

The exploring steamer Hall has been lost in icebergs near the North Pole—no survivors.

Old General Paez, the patriot of Venezuela, has died at New York, where he resided after leaving B. Ayres in 1871.

Mr. Price of the *New York Herald* is a prisoner in Havana.

London papers of May 21st have the following news—

His Majesty the Shah of Persia reached Moscow on Monday, and received an enthusiastic popular reception. At the various stations on the route to Moscow no outlay seems to have been spared to do honour to the illustrious visitor. In the evening the Shah attended the performances at the theatres.

Our Paris Correspondent telegraphs that great popular excitement has been produced by the now clearly-defined struggle for supremacy between M. Thiers's Government and the Monarchists in the Assembly.

In closing the Prusian Parliament yesterday, Minister-President Von Roon, on behalf of the King, expressed his confidence that the ecclesiastical or anti-clerical laws which have passed the Landtag will promote concord among the various religious bodies, and lead them to devote their energies to the pure service of God's word. In view of the coming elections, his Majesty gave utterance to the hope that the country would show its confidence in the Government.

Among the measures by which Señor Tutau proposes to make ends meet in the Madrid Treasury are economies in the military and naval expenditure, and the reduction by one-half of the interest on the Three per Cent. debt, payment of the other half being guaranteed at a future period. The *Correspondencia* denies the rumoured negociation for the cession of the Philippine Islands to Germany.

American telegrams report a revolutionary outbreak at Panama, and the recommencement of depredations on the Mexican frontier.

Mr. George Smith telegraphs a most interesting account of his Assyrian excavations. Having found the site of the King's Library, at Nineveh, he has been rewarded in his search by many important discoveries, chief of them being that of a broken tablet containing the very portion of the text which was missing from the narrative of the Deluge.

Prince Arthur landed at Dover yesterday afternoon, from the Maid of Kent steamer, that had been specially chartered to bring his Royal Highness and suite across from Calais. The Prince, after a worthy reception at the hands of the authorities and inhabitants of the town, proceeded by ordinary mail train to London.

Cardinal Cullen's evidence, on the trial wherein he is defendant, was finished yesterday, and his Eminence was succeeded in the witness-chair by Archbishop Leahy, of Cashel, whose examination had not proceeded far when the Court adjourned.

The interest in the Tichborne case has been suddenly revived and augmented. Yesterday the reading of the Claimant's testimony in the former trial having been concluded, one of the Chili witnesses was called, and her evidence was of a startling and most important character. Donna Clara Hayley, wife of an English doctor in Melipilla, said she was married in 1847, and about six years afterwards an English lad of sixteen, who said his name was Arthur Orton, was in Melipilla for about a year and a half. He said his father was butcher to the Queen. He stayed in witness's house about three months, and visited in the neighbourhood, and afterwards lived with Don Thomas Castro. He had a mark on his wrist which he said were the initials of his name—Arthur Orton. His hair was light, inclining to red. He knew no Spanish when he first came to Melipilla, and very little French. The defendant (the witness declared) is that same person. She never knew anyone named Tichborne. In cross-examination witness said that when the letter written by the defendant to Mr. Castro arrived in Melipilla, she said the writer was no other than Arthur Orton. She admitted also that she had received $1,000 for coming over to give evidence. The Court adjourned till to-day.

PARIS GOSSIP.

(Our Own Correspondent.)

May 12th.

Much of the infant morality of Paris is perhaps to be attributed to the sellers of Cocoa, a kind of 'baby cocktail,' sold by old men, with white aprons, and a fountain full of the 'perilous stuff' strapped on their back, with cocks within reach to turn off the beverage. These purveyors put in an appearance in the recreation grounds for children. Henceforth, the public gardens, squares &c. will be supplied with cans to furnish pure milk, either natural or boiled. Another blessing both for babies and their caretakers is the new plan of hiring a perambulator, on arriving in the grounds, as we would a cab or a velocipede. 'Steady and careful pushers' are also to be had; each perambulator is supplied with a parasol, fixed to the shafts of the vehicle, so as to be lowered, raised, or turned according to fancy, by means of screws.

On Thursday there were five capital executions in Paris, the Victims were hanged, not guillotined, and comprised unclaimed dogs, picked up by the police, for having no fixed residence. The animals are supported for a few days, if valuable are sold, if worthless hanged in batches of five, from iron gibbets in the knacker's yard, and the skins sold; the carcass is destined for the manufacturers of animal charcoal, with which sugar is refined, but there is strong reason to expect the remains are put into a machine and reappear as sausages, since special officers have been told off to examine this class of food.

The illuminated advertisements have again come into favor, and form quite an attraction to the promenaders of the Boulevards; hitherto the practice was limited to throwing on the screen, advertisements simply; the innovation consists in the display of some humorous caricature as an interlude, or a landscape &c. between the business cards.

The official obsequies of Admiral de Genouilly, were remarkable for the next to indifference exhibited by the public for the display. The whole pomp and circumstance, the associations, and the deceased even, recalled too vividly the ex-empire.

The public health department of the Ministry of the police has published its usual figures on "the great Sin of great cities" for the past year. There are 31,500 soiled doves under the 'surveillance' of the police, and 1,500 stars of the demi-monde. It is gratifying to notice a sensible decrease in prostitution, and a satisfactory working of the Contagious Diseases Act.

A 'citoyen' Free Thinker, aged four years, had the honors of civil interment the other day; the tiny coffin was followed by a group of chief mourners, all young children, holding red ribbons attached to the bier, instead of the usual white colored strings. It does make one stand and examine himself on seeing so painful a spectacle pass by.

The little strawberries so cherished by Parisians, and requiring at least 12 to make a single 'bonne bouche,' are now in season. They are raised in the neighbourhood of Paris, and each plant submits to 10 or 12 pickings of the fruit, from three days to four days. The crop has to be well watered daily; an acre of these strawberries produce nearly 3,000 'paniers' of fruit during the season, which sell at the rate of 1½ franc each, leaving a net benefit to the cultivator of over 1,000 francs.

A newspaper to induce subscribers, gives an order on a first-class restaurant for a dish of asparagus gratis.

A gentleman slept in his orchestra stall during the representation of a play; a neighbour remonstrated; 'what,' remarked the awakened," is it possible to do otherwise than sleep when so-and-so's dramas are being acted;' what I object to, continued the neighbour, is that you snore so loud, as to prevent my sleeping also.

'Why is your hair white grandpapa?' said a promising boy, aged five. 'Because I am very old; I was in the ark, my dear.' 'Then you are Noah, grand-papa." 'No.' 'Well, Shem?' 'No.' 'Ham, Japhet?' No. 'Then grand-papa,' observed the child at the end of his knowledge, 'you must be one of the beasts.'

P.S.—The elections for Lyons have resulted in the success of two Radicals by a majority of 3 to 1. But most extraordinary of all, in Haute Reime, the very st onghold of the monarchists, the Republican, or Radical candidate has won in the same proportion

The Gastronomic Exhibition may be considered as one show more; no novelty has yet appeared to authorize any change in the accepted modes of roasting, boiling, or frying. There is soup prepared from Liebig's extract, but which will never supplant the time-honored 'pot au feu'; there are sugar-bakers who make 'pastilles' and 'bijoux' in honey before your eyes, and delicious confectionary with Spanish angelic names, that make you imagine you are either in paradise or in a convent, There is coffee formed into tablettes like chocolate, and restorative liqueurs that pass all human understanding. One manufacturer exhibits 'unadulterated absinthe,' beside him a competitor who denounces absinthe as poison, and invites the public to only patronize his 'vermouth'; while a philanthropist condemns both as detrimental, and recommends his Peruvian toxa. It is the old question of nothing like leather. There is a curious beverage baptized 'la Republicaine,' prepared at Belle Ville according to the notice; it is yellow, instead of being red. The vegetables have lost a little their wild freshness, and among the artificial-flowers, turnip camelias excellently cut, figure on the tables. The second empire is recalled by an exhibit of 'imperial' cheese, which can be tasted by paying a few sous. Gratuitous tasting had to be given up after the first day's experience, the stalls in the afternoon of that day resembling the desolation caused by a plague of locusts. There Greek is bread, with and without sugar, and loaves made from flour wetted with sea or seltzer water, which after being once tasted will never be attempted a second time. A retired captain has patented a loaf consisting of two parts, one suited for soup, the other for ordinary general use. There are many kitchen utensils under new names, and the Norwegian pot that boils without fire, has a designation that claims to be measured by the foot. Table napkins must be hemmed, so this explains the presence of sewing machines, and whose whirr and burr commence when the music ceases. The possibility of indigestions being contracted, or cases of accidental poisoning occurring, justify the exhibition of pharmaceutical preparations in small boxes, called 'pocket medicine chests.'

EDITOR'S TABLE.

The Sorata's mails came up by the river steamer yesterday morning. There was a rush to the G.P.O. at 9 o'clock, but 'not till 12 o'clock!' was the answer to everyone. The news up to the 27th ult. will be found in another column. It is most significant to find that the French Rentes rose to the extent of fully 2 per cent. on MacMahon's assuming the reins of Government. "Order is Heaven's first Law," and the French people are always ready to kick everything else to the winds to secure it. Order at any price is the one idea of the money grubbing 'bourgeoisie;' and small blame to them. *Dis* order in France means 'the D——l to pay' far more than in any other country.

Over 300 immigrants landed on the mole head yesterday morning. They came out in the Sorata. Most of them were hanging about Calle Cuyo, near the Asilo, for the best part of the day, looking for employment, and some of them found it.

A German subscriber living at the Cinco Esquinas has taken the trouble of counting the number of tramway cars that pass that spot "to memory dear" every 24 hours. He informs us that 700 pass his drawing room every day. This is nearly one every minute, and it requires a smart man to miss a tram in that direction. Four companies contribute to this enormous traffic—the City of B. Ayres, National, Recoleta and Belgrano lines. Even New York could hardly produce a "corner" [famous as it is for such situations] where so many tram cars pass in the day. We hope there are not too many tramways as well as too many newspapers in Buenos Ayres.

We hear of a new weekly paper about to be started in Mercedes, to advocate camp interests. We should be glad to see such an organ succeed, which it will, if it sticks to its last, and eschews discussing politics, religion, and other dangerous topics.

We have had a number of enquiries lately about the famous Rioja mines. Even some sheepfarmers have thought of selling their flocks and buying a mine. As things stand this would be the height of folly, and we advise speculators to wait till Captain Treloar comes down, which will be, in a short time, and discover how matters really stand up there. For our part we should decidedly prefer a flock of sheep in the hand to any number of gold mines in the bush, Rioja, or any where else.

We had an interview with our barber yesterday. There are no pleasanter or more chatty fellows than barbers, who, before newspapers were invented, were the best receptacles for and retailers of news and gossip, and the talent has descended to the present generation of shavers. The artist who had the honour of operating on us gave us a bit of information that will interest our fair readers, viz—that the dearest import into this market is human hair, which is literally worth its weight in gold, or £40 per lb. The chief sources of supply are France and Germany, where women sell a luxuriant crop for a dress or a silk handkerchief. The hair of the women of America is worth nothing to the 'peluquero;' it is too coarse and brittle to work into shape, while that from Europe, is as fine as silk. The hair of a dead person is worth nothing. Our artist considers this great difference between European and American hair to be mainly due to the difference in diet.

True Happiness.—No man can know what true happiness is who has never been married, and had a mother-in-law and a wife's aunt living in the house with him, and then saw them die.

"An afflicted husband was returning from the funeral of his wife, when a friend asked him how he was. 'Well,' said he pathetically, 'I think I feel the better for that little walk.'"

The Pacific steamer Illimani is due at the Mount on Monday next from Liverpool. No very particular news need be expected by her, unless MacMahon may have been forced to administer a little grape and canister to the Red mob at Paris, which cannot be expected to feel too well pleased at recent events. 'On dit' that the French Minister here had a long interview with Dr. Tejedor on Wednesday on the subject of the change of Government in Paris. What opinion the Doctor expressed on the point has not transpired, and probably never will.

The male Foreign Community in town never goes out at night now, the reason being that its stalwart members are afraid of being nabbed by the Press-Gangs on the look out for recruits. The various Consulates are kept busy with applications for 'papeletos' to secure foreign flesh and blood from becoming a mark for Jordanite riflemen. We have not heard of any editors being caught yet, and hope we won't.

The new measure brought forward in the Chambers to ease the money crisis was the universal topic in all circles yesterday. If passed it will afford temporary relief, that's all. There is more nonsense than ever spoken about the aforesaid crisis, and theoretical means to relieve it, based on the first principles of everything but financial economy, are propounded by Thomas, Richard and Henry. Even the ladies are taking it up, as it affects their pin money. Cedulas seem bound for 70 or thereabouts.

A London friend writes to us that a club, to be called the Salon, is being formed in that city, of ladies and gentlemen together, with the object of holding social meetings on one or more evenings in the week. It professes to hold no pronounced political or other opinions, but of course will attract chiefly the advocates of women's rights and tolerably advanced political thought.

Our exchanges of yesterday contain a severe review by the *Spectator* upon Mr. M. G. Mulhall's travels in Rio Grande. We shall try and make room for the remarks of our censorious colleague to-morrow or after.

Messrs Jacobsen and Soderstedt request in to say that they received yesterday the *London News, Graphic, Saturday Review* and other London weeklies, to May 17th and *Times* &c. to the 20th May. French weeklies and dailies to 24th; also German and Belgian to 23rd.

Our Montevidean subscribers will be sorry to hear that we are supposed to be in mourning for our "repartidot mayor" in that city who lately "shuffled off" quite suddenly to that bourne where there are no "reclamos", and if they are made they are not attended to. We trust our numerous readers in the sister-city will "accompany us" in our "justo dolor" at this afflicting editorial bereavement, and excuse any irregularity it may temporarily cause in the delivery of their papers.

The new bronze side doors of the Provincial Bank were put up yesterday, and all day long a crowd (half of it washed, the other guiltless of soap and water) stood in Calle San Martin admiring the "puertas", with open mouth. They are extremely handsome, and being the very latest, have a title to be classed as the finest thing of the kind in the city, which we have no doubt they are.

The provisional communication which was established a few days ago with the military authorities in Paraná, by means of a temporary telegraph office on the island in front of the Brete, has been materially improved by Mr. Burton, who, having a perfect knowledge of the topographical position of the different islands, has been enabled to construct a short line of two miles in length which brings the port of Paraná within 15 minutes run by a small steamer belonging to the war department. Trees have been used instead of placing posts for this new line.

At the last sitting of the National Deputies Dr. Gutierrez got another three weeks leave of absence, to recover his health. Several petitions and pensions were disposed of and granted. Mr. Llanos brought in a bill for the publication verbatim (oh Moses!) in the papers of the debates in the House. It was sanctioned with avidity till the House came to the clause providing for the payment of the piper, when there was a general break down, and the project was hustled off to a committee, the Refugium Peccatorum of every Parliamentary thing. Before rising the House voted a small supplementary credit to the Minister of Instruction.

Not a Miss.—A rich, handsome widow.

A vigorous shake induced our celebrated Barometer to show its hand yesterday. It moved towards Rain, so probably we'll have a nice dry week or so.

We hear of several wealthy and influential Irish estancieros who intend taking up their residence in the city during the winter months, in order to be better able to attend the weekly meetings of the Saint Patrick's Society. This shews how the men of the camp appreciate the new Association.

Our old subscriber Turmeau is again in the field with a novelty—from Tea to Corned Beef, from Sandwiches to Beer. We could write a column about the lobster and other sandwiches Mr. T. sent us for lauch yesterday. "Hors ligne" is faint a expression for their unapproachable excellence. One could think the fish had just been caught off Dalkey Island so delicious did they taste. To improve their flavour they were wrapped in paper, on which the following delightfully original conundrum was inscribed:—Why are Turmeau's Lunch Rooms like the Desert? Because of the sand-wich-es there. Magnifico, Mr. Turmeau!

The Mercedes races are adverticed to come off this year on the 5th of August, over the same course as in 1872. By the way, there is not a finer course in South America than that at Altamiro, and if the weather prove propitious splendid sport may be looked for.

The South Cathedral Salubrity Commissioners have threatened to resign because the Lord Mayor had too much to do to take the smallest notice of their last official note about that laughable business of fining the President's escort on the 25th of May. It's too bad of the Lord Mayor, really it is; but we hope the Commissioners wont resign; if they do, there'll be a general convulsion of Nature, as sure as eggs are eggs.

The last number of the "Anales de Agricultura" is very good. It has a cut of Mameluke, the famous Arabian sire. The reading matter is as interesting and diversified as usual.

The Municipality have taken back all the employees they lately put "à la porte" in such an unceremonious manner. The question of how they are to be paid must come up again. Mr. Eastman has resigned his Aldermanic gown.

Our neighbours at the Mount are going to get up a last resting place tramway, to take corpses from the city to the cemetery at the Buceo. This lugubrious and grave speculation is in the hands of Mr. Nin. We would not hold a share in such an enterprize for anything.

The statutes of the Skating Club have attracted attention. They are the most minute, precise and incisive code of the kind we have seen for some time, and do honour to the author. The Club is getting on extremely well, and will probably pay a good dividend.

Mr. Lord Mayor Umbrella is thinking of resigning. 'Twill be a pity if he do, as he is the only spunky Lord Mayor Buenos Ayres has had for a long time. Since he took office he has kept himself and everyone he could lay his hands on alive, kicking and in perpetual hot water. It is refreshing to see a public officer who has a contempt for Sleep, 'Mañana' and a good many other indigenous productions.

The man found dead in Calle Parana lately met his death through a lark. While walking with a friend he dared the latter to strike a man passing by. The friend did so, and received a stab in the arm. Deceased then pursued the man who did it, and had his "goose cooked" on the spot. The police are looking for the man who did it, but as far we can see he only acted in self defence, having been gratuitously assaulted, and, no doubt, thinking deceased was about to make a second attack on him he polished him off.

MR. LINDMARK'S REPORT.

Gentlemen,

I hand you a few remarks upon the report published by you per packet edition of the 14th by Sen. Lindmark, National Government Engineer, upon the port of Buenos Ayres.

I have great pleasure in doing so because it fully bears out the opinion, I expressed in your paper 2 years ago and such opinion, I have never had occasion to alter in the slightest, but month after month and move after move that has been taken in the matter has more fully strengthened such opinion, the reverse of which and you many others entertained, imagining that it was impossible for such an eminent engineer as Mr Bateman to make such a mistake.

I cannot follow all Mr. Lindmark has written, as it is too long, but I fully agree with almost everything he therein states, I think it would have been much better to have gone straight to the point at once, but the matter therein contained shows clearly he is thoroughly master of the subject he treats upon. Mr. Lindmard remarks upon the lucidity (and I may add absurdity) of the general terms, the actual state of commerse here, its progressive development of late years and the general features of the River Plate and its trillutaries all of which must be known to the older inhabitants. Mr. Bateman certainly devoted greater attention to copying statistics imaginary quantities of water &c. I, like Mr. Lindmark, appreciate such data when to the point and a necessity, but in this case quite unnecessary.

The banks are shifting banks the sand shifting sand and the channels shifting channels and instead of the compilers of the South American Pilot being misrepresentations, it is clearly Mr. Bateman who misrepresents the matter; and the simple fact of horses' shoes and cart wheel marks being imprinted in the sand is indeed very childish, and not to the purpose at all. Nature as Mr. L. says by no means favors the establishment of a port fronting the city is perfectly true, and no dock can be made of any use whatever in such a situation. A remark of Mr. Bateman's that in designing improvements several points must be kept in view.

"Nothing should be done that would tend to alter such currents as exist or to endanger the permanency of the deeps." What kind of logic or reasoning is this. Does he not run his channel at a right angle nearly to the current that exists. The Inner Roads again he says all abrupt projections into the river should therefore be avoided. Now the position of his dock to the channel is an abrupt projection into the river, therefore these diversions of plan and printed matter cannot be reconciled together, and are quite contradictory of another remark. He says the character of his docks (when they become docks) are determined by the small and uncertain rise of tide. They should be tidal basins 'without gates' or intervening locks.

Now I should have imagined that this small and 'uncertain' rise of tide would have been the very grounds why tidal gates should be placed. If no water is in the channel none can be in the docks, whereas tidal gates would have retained such water until the next rise of the tide. However, I have seen a little Argentine business or 'negocio,' as it is called here, and I have no doubt the same can be turned to account. The sewage scheme is mismanaged; with its fever breeding conduits and patched up schemes all will be well; in a few years the same commissions, if not overtaken by fever this next summer, may yet live to order the same to be filled up. Mr. Lindmark might have gone a little further, and told us that the seven months dredging had been all labour in vain, and that where they first commenced was already filled up, but, as he, Mr. Bateman, has Government permit to make his trial for 12 months, I suppose we shall have to wait five months more before Mr. Moore throws up the sponge, or the dredge the last bit of—

B. Ayres, June 16th, 1863.

ON 'CHANGE.

June 19, 1873.

Ounces	400
Sovereigns	122½
Patacons	25
National Bonds	75½
Cedulas	82½

This was the worst day on 'Change as yet; both Bonds and Cedulas give way beyond every expectation; Cedulas, particularly, falling from 84½ to 82½, and even at this low figure no buyers. The first signatures in the market were done today at 24 per cent per annum, and money asked for on Cedulas at the same rate, but could not be had. The squeeze to-day amongst Cedula people was greater than ever. Everyone seemed anxious to know what is to be done. At 3 o'clock the Bolsa was crowded beyond measure, and at 3.30 Mr. Wehely, of the firm of Wehely, Gimenez and Co., mounting one of the benches in the hall, said—

"Gentlemen—In view of the present severe crisis in this market I and many others think that the time has arrived when the commercial body of Buenos Ayres should make a move. The very sad state of affairs in this market is known to you all. I propose, gentlemen, that we now name a committee to take steps for the calling of a general meeting at this Bolsa, to-morrow, at the same hour." (Applause).

The following gentlemen were then named on the committee:—

Dn. Mariano Billinghurst,
Bernardo Iturraspe,
Apolinario Benitez,
W. Bertram,
J. Lanus,
V. Lynch,
Antonio Rocha.

The excitement on the Bolsa was extraordinary, the Galleries were thronged, and people on all sides speaking. Some parties very loudly said that the whole business is in a nutshell and that "curso forzoso," is the only true remedy to keep the gold in the country possibly to-morrow at the meeting this affair will be discussed.

The sales during business hours were as follows—

National Bonds nothing done—

Cedulas—

For cash series A,	27,000	84½
Do	do 10,000	84½
Do	do 5,000	84½
Do	do 10,000	84½
Do	do 2,000	84½
Do	do 3,600	84½
Do	do 6,000	84½
Do	do 10,000	84½
Do	do 1,000	83½
For 30th June, A,	10,000	84½
Do	do 10,000	84½
Do	do 20,000	84½
Do	do 10,000	84½
Do	do 5,000	84½
Do	do 10,000	84½
Do	do 10,000	84½
Do	do 10,000	84½
For 31st July, A,	10,000	85½

In the liquidation things ruled still tighter, one broker offered to sell 10,000 Cedulas for to-morrow at 82½, but no buyer. For the end of the month: 5,000 A at 83 and buyers for end July at 84.

National Bonds—

30 000 bought for end of June 75¼

5,000 bought for end of June 75½.

Exchange was done to-day at 48½ bank; commercial bills offering at 49, but no money, no takers. Bills done to-day on Paris, for Savoie, at 5.22.

Discount brokers report to-day money tighter than ever, and no money to be had anywhere. Even to pay the 10 per cent amortization to the bank there is much of a pinch.

Mr. A. Lamas was welcomed on 'Change to-day; he reports money tightening much in Rio, and the rate of interest up to 12. It seems the Brazilians have shipped large amounts of specie to Barcelona, Lisbon and other parts to pay for tramways that the Brazilians are building at those places.

The Antwerp steamer Ariadne will sail on Sunday. She will take good cargo.

The mails bring final result of Antwerp auction viz—

32,390 bales offered.

30,715 sold. Further particulars to-morrow.

The Sorata made a splendid run down, and but that the Capt. shut off, she would have made the run down in 2½ days, Mr. Lamas says she is the finest steamer afloat.

Mr. Bacon, has arrived down from Paraguay, but it appears that the gold has not been paid to the Paraguayan Government, neither has it been brought down here, we understand it remains on board the Princesa There was great enquiry about this business to-day as there are over due drafts in the market.

We received the *Times* of 23rd May late this afternoon, the latest in the Plate, but must hold over extracts for to-morrow, the London money market shows continued improvement.

Mr. Terence Moore was admitted a member of the Bolsa yesterday, and welcomed on 'Change to-day.

Captain Thompson, of Rosario, was also welcomed on 'Change to-day. He reports things in Rosario very dull.

The sale of 1,100 pipes of tallow mutton was announced to-day at 14 reales.

It was rumoured on 'Change that the Sorata has brought down specie from Rio to the Maua Bank, Montevideo.

The Mortgage Bank publishes notice that Cedulas registered in owners' names will only be paid on identification.

The Savoie cleared to-day with a good cargo and a few passengers. The Sorata's passengers, 300, came up this morning.

Some shares of the new cloth factory were offered on sale to-day; no price offered, no buyers.

Two cargoes of coal have been sold in these days one at $f 17 pats., and the other at 16 pats.; coal rules slack.

Gas shares hold their own, 2,300 offered to-day and declined.

Some large capon contracts spoken of, for graserias at 40 m/c.

The Sorata's mails came up to-day and the general tone of the letters we are happy to say shows an improvement, money at latest dates from London had become much easier. The whole of the European press is unanimous in its praise of the measures adopted by the Austrian Government. All the joint stock companies in Vienna were ordered to present their books to show how they stood, and those not considered sound were ordered to be at once wound up: the losses caused by the crisis have purely fallen on speculators, the commercial people have suffered comparatively little, and things now look much brighter.

But the great news of the day was the Prov. Government measure laid last night before the chambers, and which was received by the house with the greatest unanimity, the measure is simple, short and effective; namely to deposit stocks to the value of 3 000,000 patacones, and withdraw the equivalent in specie, and secondly to sell the 5,000,000 Nat. Bonds at 75 cash or to negotiate with a house here for the sale of same at the best price in London, the house here drawing for acc. of the business. This measure was much discussed in the Bolsa to-day, and considered by all as perhaps the best and most effective that could be carried out. It has been sent to committee, and will probably be passed through the House at once and made law There is some apprehension about the want of a quorum in the Senate, but it appears that there is one more than the number requisite, consequently in case of sickness of one member there would be still a sufficient number.

A public mercantile meeting on the Bolsa was spoken of to-day, and we heard that permission had been asked of the Sindicate for the hall. The object for which the meeting will be called is to consider the best measures to be adopted to ease the money market, and terminate the crisis. The crisis has now held since 20th of last March, 90 days, and without a single failure or suspension in the market, which speaks much for it. What measures can be resorted to, it is indeed difficult to say, but perhaps the plan proposed by the Provincial Govt. last night in the Chambers is the simplest and best; there can be no doubt as to the effect of the measure on the exchange market, it will not only drive up the rate, but keep the rate up for the rest of the winter months.

There is, of course, immense anxiety to know what about the Mortgage Bank and the proposed resolution to stop emitting for the present. The impression is general that the Board cannot refuse to omit, and the applications at present are greater than usual.

The following commercial advices have come out by Sorata—

Tuesday Evening.

"The principal feature to-day has been the abundance of money everywhere, for which no employment could be found, except at rates considerably under those of the Bank. In many cases only 5½ per cent. was charged; but exceptionally good paper could be done for even less, and on the Stock Exchange loans for short periods were taken at 4½. The discount demand both at the Bank and out of doors was trifling, while there was an influx of money from the country bankers to profit by the recent rise in the rate. The heavy withdrawals of gold are still postponed, the amount taken out this morning being only £52,000 for the Continent; but statements are still repeated that much larger sums will be wanted almost immediately. For the present, however, all the symptoms point to growing ease; and the Stock Exchange, under the influence of this improvement, has shown a rising tendency all day. Among the Foreign Securities Turkish and Egyptian were again better, on additional purchases induced by the late fall, and American also advanced, Erie Shares with the rest. There was, on the other hand, further dullness in French which followed the fluctuations on the Bourse, and in Spanish, notwithstanding confident statements that the Minister of Finance had provided means to meet all his engagements to the end of June. English Railway Stocks were generally better on some good investing purchases, the northern lines being specially buoyant. Telegraph Shares fluctuated a good deal, and were at one time forced down to a much lower level by speculative sales; but on the news that the French Atlantic Cable had been picked up there was a general rally, which made further progress after the official close.

"The Funds continued firm at yesterday's improvement. Consols left off at 93⅛, ⅜ for money, and at 93⅜, ½ for June."

Mr. Yarrow received telegrams to-day announcing the arrival of Caldera last night and her departure for Liverpool to-day.

We call the attention of farmers and estancieros to Mr. Bullrich's great ram auction at his new premises 70 Potosi. pure Negretie and Leicester rams. The animals are greatly praised by all who have seen them, and as the wool from the flocks from which these animals were taken has been sent to Europe for sale, the following extract from Mr. C. T. Getting's letter dated May 3rd 1873 is important.

"Your 3 bales Leicester realized the highest price of all the Buenos Ayres wool, sold at Havre and is much liked."

The telegram on the Black-board was—

"Caldera Arrived from Valparaiso, steams to-day for England."

The news from Rio is important. After the departure of the packet exchange opened hard at 25½, rising to 25¾, and was unaffected by the news of the low rates in the north. Bank rates close 25½; commercial, 26¼. Close on a million sterling passed; on Paris two million francs at 365.

Salt—The demand for Capo Verde continues firm at 660 to 680 reis. Fino Oporto abundant, and sales difficult at 800 reis.

Coffee—Since our last issue an active business has been done, total amounting to 118,672 bags.

As a natural consequence prices have been well sustained, and our last quotations have undergone no modification.

Demand in the past few days has been less general; but the decreased average of receipts, consequent diminution of stock, and renewed tenacity of holders, have strengthened the position of the article, and the market closes firm. Owing to an accidental landslip on the railway, supplies from the Interior have temporarily fallen off, and the daily average, since our last, does not exceed 4,300 bags.

Stock in all hands is estimated at about 135. 00 bags.

The Pernambuco branch of the New London and Brazilian Bank, Limited, was declared constituted on the 7th, by an order of the President of the Province.

Among the deaths from yellow fever at Pernambuco were those of Capt. and Mrs. de Jauge, of the Dutch barque Haydn.

Captain F. Nicola, of the Italian barque Dei, loaded at Pernambuco for Liverpool, had to be removed to an hospital, he having become crazed. During the voyage from Montevideo he showed symptoms of decided mental disorder, on one occasion throwing overboard all the nautical instruments of the barque.

The Danish brig Christian grounded at Sergipe, on the 13th, when entering the port, but was got off next day and towed in. No great damage was done.

The Danish barque J H Love put into Bahia May 8th, four of her crew being sick.

The line of tramway omnibuses between the Campo d'Acclamagao and the Fluminense ferry house commenced running on the 17th.

That in Nictheroy to Santa Rosa was inaugurated on the 18th.

The Companhia Paulista has undertaken to construct and work the Campinas and Rio Claro Railway, without guarantee of interest. The contract with the province was signed on the 13th.

On the 7th a capsized vessel, coppered, was seen in Lat. 30 deg. 16 min. S. and Long. 49 deg. 54 min, W. Gr.

A new bank, to be called the Rio Grandense Bank, is being organized in the city of Rio Grande do Sul, with a capital of 1,000:000$ in 200$ shares.

Ale—Continued large arrivals and demand limited. Prices are declining and Ilhers and Bell sells at 7$500. All brands are neglected.

Coals—Are in good demand and arrivals very limited. We quote all qualities 2$ per ton higher with an upward tendency.

Flour—The market closes firm, with a stock of 23,000, we quote Baltimore 24$, Galego 25$, and Chile 20$.

Kerosene—Owing to limited arrivals, prices are firmer, and the higher prices in the United States give additional firmness. Last sales have been at 11$500.

The Crisis.

The crisis in the Cognac Market is now at its height. Barran and Briet hold the market, being the sole Agents of Dupuy's famed Brandy in the Plate. The Brandy tightness is complained of by all the hotel keepers and confiteros in town, and until a few more clerks are out on at the Custom-house, a returning ease in the Brandy Market cannot be looked for.

YARRUM'S
PECTORAL SYRUP.

THIS is the BEST COUGH MIXTURE extant, as it cures the most invêterate one in a very short time.
It facilitates expectoration, loosening the most hacking Cough and producing relief instantaneously, affording by these means repose not acquired by the use of other vaunted preparations.
For Children's Coughs there is nothing like it, and if they are troublesome at night a teaspoonful will soothe them at once, thereby allowing their mothers rest when most required, as has been testified by hundreds.

SAVINGS BANK

BANK MAUA AND C O.

101--Calle Cangallo--103

BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the great emporiums of the River Plate, Montevideo, and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Maua & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depository for their savings.

The sums deposited in that very important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, workingmen, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need sickness, or old age, instead of spending them in immoral gambling, in lotteries, and other stupidities.

The Bank of Maua & Co. of this city, following the example of their firm in Montevideo, the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositor a pass book in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interes will be calculated up to date.

The Bank of Maua & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867.

P. P. MAUA & Co.,

M. A. DE FREITAS AMORIM

En el acto de pagar el primer trimestre se le entregara al comprador el terreno y durante los dos años de plazo que tiene para pagar puede hacerse producir el mismo terreno lo suficiente y mas como para satisfacer las mensualidades.

Suitable only for this Climate and Not for Europe.

It is manufactured to suit Summer, Winter and Spring, and is only used for Railways, Tramways and Carts, Bullock Waggons, &c.

It consists of Nine different fluid oils and solidified by a chemical process. It will resist the hottest sun, and will not get into a liquid or fluid state. It is only when the action of the axles comences it becomes a rich creamy fluid, and when the action stops its again solidifies.

It is of a suitable consistency, of good lasting power, attended with but little increase of temperature even at the highest speeds, and leaves but the smallest residue in the axle boxes. A grease which is too firm will remain comparatively solid in the box, and allow the axle to become hot, whilst on the other hand one that is too thin becomes exhausted by a few miles running.

This Grease is of more importance than at first sight appears; for while the grease account a railway companies forms no inconsiderable itet of expenditure, the waste of motive power and wear and tear of plant entailed by the use of unsuitable grease is enormous.

The merits of the Grease, in its general utility as a

LUBRICANT,
and also for its
CHEAPNESS,

are shewn, when compared with other kinds hitherto used, that are entirely useless for any purpose but that of lubrication.

It is therefore much less liable to be pilfered and misapplied than tallow, lard, neatsfoot oil, petro oil, rape oil or gallipole oil.

These oils always command a ready market if pilfered, a circumstance which induced the principal railway companies in England to adopt Yellow Grease for their protection and manufactured to suit European climate.

Bristol's sarsaparilla

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compound, of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their source in the blood and humors; these different vegetable extracts are combined in such a way as to retain, in full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Honduras, is that which we use in this preparation; it is the kind which all medical men esteem most. About fifty per cent. of Bristol's Sarsagarilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and healing vebetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

By having our own agents at he places where the various roots, drugs, herbs and plants, composing our medicines, are produced, we are enabled to exercise that constant care in selection which insures uniformity of excellence, and we spare no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that in Bristol's Sarsaparilla you have a remedy more reliable than any before offered to you, and which will no disappoint you in the cure of.

Abscesses, Boils, Eruptions
Scrofula or King's Evil,

& Dumb Ague.

As a means of building up the constitution that has been broken down by the excessive use of Mercury, Iron, or other Minerals, our Sarsaparilla will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood and humors, in the Spring and early Summer, it will the found unfailing. It can be taken freely at seasons, rainy or dry. For some of the above diseases, the use of the Sarsaparilly must be continued a considerable time, especially for those that are hereditary, or constitutional in their nature—such as Scrofula; but a faithful compliance with the directions will always relieve and mitigate, and in a great majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be greatly hasted by using our Bristol's Sugar-coated Pills, in moderate does, in connection with the Sarsaparilla; they carry off large quantities of morbific or diseased matter set free in the system by the Sarsaparilla, and in this way facilitate the return to rmal fnuctional operations —cj— 46
